Denver, CO

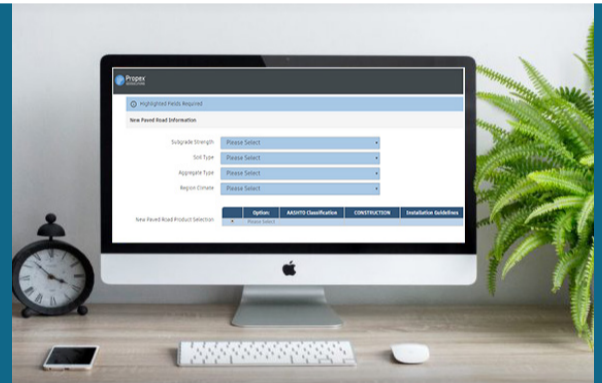

Introducing PETROMAT[®] Plus-White! The Cool, Track-less Paving Fabric

PETROMAT Plus-White is the only paving interlayer that ensures optimal installation for all environmental conditions. Its solar reflective properties keeps it up to 50° F cooler than dark paving fabric, making it an optimal choice for hot climates.

Additionally its reflective properties make nighttime installations easier. [Click here to learn more](#) about how PETROMAT Plus-White can improve your next paving project.

New Product Selector Guide

Need help determining which product is right for your job? Our new interactive selection guide has the answer. Just follow the prompts and fill in the fields with the appropriate information about your job. The selector tool will then populate which product is be the best fit. It's that simple! [Click here to get started](#)

Gateway Pond Bank Restoration

The banks of a stormwater system in a large neighborhood development were experiencing severe erosion due to wind driven waves, irrigation drawdown and changes in seasonal groundwater levels. [Click here to learn](#) how ARMORMAX was used to combat property loss and provide an aesthetically pleasing erosion control solution.

Propex Employee Development

Propex believes in investing in our employees and fostering a culture that promotes a sense of continuous improvement and growth. Partnering with Northwest Georgia Technical College, we've established an employee development program that provides the tools and support needed for growth within our organization. Opportunities include enrolment in an associate degree program for Industrial Systems Technology, leadership development programs and electrical training courses. To date we've had more than 20 employees participate.

Last month Top of Georgia, an economic development initiative of the Northwest Georgia Joint Development Authority featured Propex and our employee development program in its regional recruitment materials.

Mountain Creek Project Receives Award

Propex GeoSolutions received IFAI's Award of Excellence for its Mountain Creek Shoreline Restoration project in Chattanooga TN. This project used a combination of SCOURLOK and ARMORMAX to provide erosion control and stabilization. [To learn more about this project click here.](#)

Propex Holding, LLC Sells Concrete Division

On Nov. 6, Propex Holding, LLC announced the sale of its global concrete division, Fibermesh, to Sika. Sika is a diverse global company fully vested in the concrete industry. It has a solid record of commitment to its acquired companies, investing in the long-term achievements of its people, products and customers. We are confident that Sika will continue to advance the mission and goals of the Fibermesh brand. This sale allows Propex greater commitment and financial flexibility for our existing business units, especially our growing GeoSolutions division.
